Packt>

www.packt.com

For over a decade, Packt have published resources that allow technical FTEs to stay at the forefront of technology, with over 8000 books, videos and courses available and 100 new titles published a month. We cover thousands of tools, languages and concepts to help institutions keep subjects relevant through the age of digital disruption - in turn helping your students to master the skills needed to enter the workforce.

For our book format, we are able to offer the full Packt database and collections through campus licenses with institution level functionality (i.e. MARC records), with all options on access available to discuss.

All our titles are hands on and practical, giving students the chance to build their practical skills that are directly relatable to the workplace.

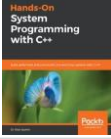

We also partner with academic aggregators, our content allows you to offer the most up-to-date and exciting technology titles for your students and patrons.
